## Getting Around:

To navigate the CD, click the menu buttons located at the left side of the screen. These buttons allow you to access user documentation, view Help and Contact information, and perform global keyword searches.

## Hypertext Links and Bookmarks:

Each user manual contains a hypertext Table of Contents and Index. Internal cross-references are also clickable. In addition, each chapter has a list of hypertext bookmarks located at the left side of the screen. Click on hypertext links and bookmarks to open referenced chapters or pages.

## Searching the CD:

This CD includes a global search index that covers all User Manuals. To use the search capability, you must have Adobe's Acrobat Reader with Search installed on your computer. Installer programs for Windows, UNIX, and Macintosh platforms are included on this CD. They can be found in the 'acroread' directory.

There are two ways to execute a global keyword search:

- 1) Click on the **Search** link located at the lower left corner of the screen. A search box will be displayed. Type a keyword in the text field and click the box's 'Search' button (or press <Enter>).
- 2) Click the  button in the Acrobat Reader menu bar. A search box will be displayed. Type a keyword in the text field and click the box's 'Search' button (or press <Enter>).

## Searching Within a Current Document:

To find a keyword within a single open document, click the  button. A find box will be displayed. Type a keyword in the text field and click the box's 'Find' button (or press <Enter>).
