Exercise No. 10
Peer-To-Peer Networks
Summer 2008

Exercise 15 *Bittorrent*

1. Install a Bittorrent client on your computer (e.g. Azureus).

2. Download a current Linux distribution using your client. For this, find a (legal!) torrent file on the Web. Download it and start the Bittorrent client.

3. Report all the available details of your download (Upload, Download, Swarm size, speed, etc.)

4. Explain how NAT servers can decrease your download speed at Bittorrent.
